SESQUICENTENNIAL TREE CARVING PROJECT **FOR THE 150th ANNIVERSARY OF BUENA VISTA TOWNSHIP**

Dear Sponsor:

In 2017, Buena Vista Township will be celebrating its 150th Anniversary. We are reaching out to businesses and residents in our community in hopes that you will help us achieve a very special "one-time only" request for funds that is outlined in the paragraph below.

In the Richland Village section of our town, we have a giant white oak tree that reached the age of 235 years old. It died last year. It was a beautiful tree. We are making an effort to fund raise to make a carving out of the tree trunk and lower limbs featuring highlights of our Township's 150 years in existence. The tree is huge and we need the funds to hire a well-known chainsaw carver to make a permanent memorial out of this historic old tree located in the center of Saw Mill Park on Route 40. It will be lighted and capture the spirit of the fine tree this once was. It will feature a semi-circle of young white oak trees that will grow in the future behind the huge carved tree. There will be new walkways and fencing required also.

All funds raised will go directly to this project. We would truly appreciate any help you would consider. We started this project in October. Donors for this special project can make a donation or purchase brick pavers (see attached form). Also see the attached simulation on the next page of what the project would look like after the tree carving is completed.

Sincerely,

Mayor Chuck Chiarello
Buena Vista Township

Celebrating 150 Years 1867 - 2017

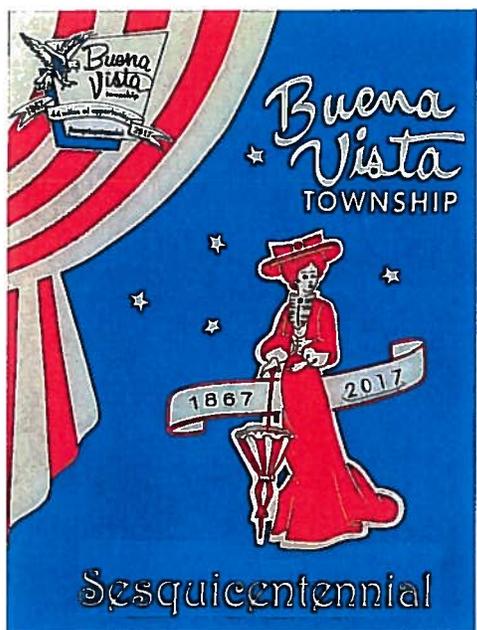

BUENA VISTA TOWNSHIP'S SESQUICENTENNIAL TREE CARVING PROJECT

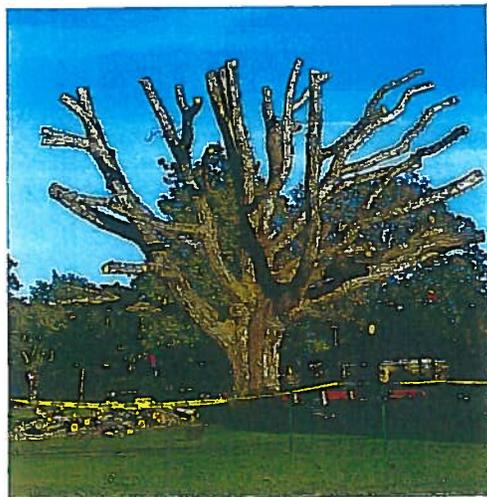

150th ANNIVERSARY 1867 - 2017

Above: Tree in its glory days.

Below: Recently trimmed for Carving Project.

The above simulation of the Tree Carving Project would give decades of life to this beautiful Giant White Oak tree that died in 2015. The work would be done by a professional chainsaw carver and would go 360 degrees around the huge trunk of the tree. Six young White Oak trees would be planted behind the carving and a new circular walkway and fence would be installed at the base of the tree. Existing lighting, benches and adjacent walkways would be utilized also
